

## BRAKE PADS

### All-NEW Metallic Friction Technology

- ◆ Reliable & comfortable braking
- ◆ Precision size meet OE standard
- ◆ Perfect fixing

### Chamfer

- ◆ Noise reduction
- ◆ Vibration reduction
- ◆ Extended pad life

### Slot

- ◆ NVH control
- ◆ Cleans brake surface
- ◆ Optimum heat transfer capability

### Multi-Layer ORGANIC Back Shim with white standard sticker or 3M performance sticker

- ◆ Noise and vibration reduction
- ◆ Extended pad life

### Steel back plate

- ◆ Perfect fixing
- ◆ Precision size meet OE standard

### Anti-Rust Powder Double Coating

- ◆ Protection against oxidation

### High Performance Heat-Resistant Adhesive

- ◆ Confidence during every braking

### New Safe Box

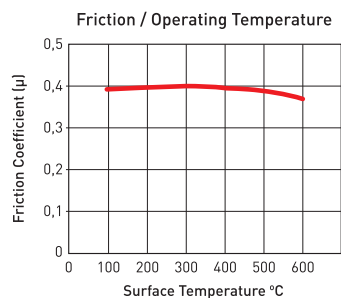

- ◆ Inner insert protecting against shifting
- ◆ Sticker with a hologram

E11

ECE-R90

The highest quality of braking regardless of temperature

## BRAKE SHOES

### Positive Technology

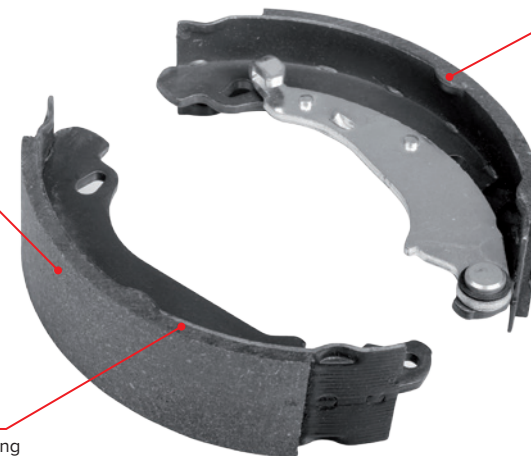

- ◆ Stronger than ever

### Perfect Fitting

- ◆ 100% Radius Control

### All-NEW Friction Technology

- ◆ Reliable & comfortable braking

### New Safe Box

- ◆ Inner insert protecting against shifting
- ◆ Sticker with a hologram

E11

ECE-R90

### Moving on Safety

Protechnic brake shoe is available now in production by POSITIVE Technology.

Friction powder is injected into the positive tooling after vacuum formulation mixing. All process made by computer controlled automatic equipment.

ONE go, ALL finish, friction performance is more reliable, friction lining is stronger than ever.
